

BIO-MEDICAL PROJECT LIST

1. Ambulance Tracking With Patient Health Monitoring Using GSM GPS
2. IoT based Baby monitoring System - Smart Cradle
3. Patient health monitoring in Cloud (heart beat and body temperature) over Internet of Things (IoT) – (based on Bio Medical)
4. Smart Wearable Health Band
5. Remote ECG Monitoring System using IoT
6. IoT-Based Elderly Fall Detection System
7. Body Temperature and Pulse Rate Monitoring System
8. Smart Medicine Reminder and Dispenser
9. IoT-Enabled Wheelchair for Patients
10. Smart Hospital Bed Monitoring System
11. Monitors patient vitals and bed occupancy.
12. Smart IV Drip Monitoring System
13. Smart Air Quality Monitoring for Hospital Rooms
14. Tracks surface disinfection or hand sanitizer usage using IR sensors and IoT logs.
15. Smart Temperature and Humidity Control for Incubators
16. IoT monitoring for neonatal care units.
